EDUCATION

Amity University Jharkhand

Bachelor of Technology, Computer Science and Engineering — CGPA: 8.0+

Ranchi, Jharkhand

May 2023 – May 2027

DAV Public School, CBSE

Class XII (Senior Secondary): 88% — Class X (Secondary): 93%

Jharkhand

March 2021 – March 2023

EXPERIENCE

Full-Stack Developer Intern

2025 – 2026

Sustainable Business Union

Remote

- Built and deployed a multi-tenant web platform using HTML, CSS, JavaScript, EJS, Express.js, and MongoDB, serving multiple live domains from a single codebase.
- Implemented tenant-based routing architecture enabling multiple client domains to operate independently on the same repository without code duplication.
- Handled end-to-end deployment pipeline and production environment configuration; all client websites are live in production.

PROJECTS

Mind Log App | *Spring Boot, Spring Security 6, MongoDB, Redis, RBAC* | [Live](#)

Sept 2025

- Engineered a Spring Boot application exposing 15+ RESTful APIs with JWT-based authentication and role-based access control (RBAC) using Spring Security 6.
- Designed MongoDB-backed persistence layers and integrated Redis caching, reducing API response latency by approximately **50%** for frequently accessed resources.
- Containerized the application using Docker, implemented automated background jobs with Spring Scheduler (Cron).
- Documented APIs using Springdoc OpenAPI (Swagger), managed environment-based configuration, and deployed the application on Railways.

Movie Hunter | *React, Vite, React Router, Context API, TMDB API* | [Live](#) | [GitHub](#)

2026

- Developed a responsive movie discovery application using React, Vite, and React Router with dynamic route handling for seamless multi-page navigation.
- Integrated The Movie Database (TMDB) REST API to fetch real-time trending titles and power an interactive search bar component.
- Engineered global state management using the React Context API to support a dedicated favorites section for bookmarking preferred films.

React Lottery Game | *React (Vite), React Redux, JavaScript* | Lottery, Comment Component | [Live](#)

Jan 2026

- Built a collection of React projects covering core concepts: component architecture, props, state, hooks, and event handling.
- Used React Redux for global state management in the Lottery project, simulating real-world state patterns.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, C/C++, SQL

Frameworks & Libraries: Spring Boot, Express.js, EJS, React (Vite), Spring Security, JDBC, React Redux, Bootstrap

Databases: MongoDB, MySQL, Redis

Tools & Platforms: Git/GitHub, Swagger (OpenAPI v3), Docker (basic), Railway, Vercel, Render, Postman

Concepts: RESTful APIs, JWT Authentication, Multi-Tenant Architecture, Redis Caching, Cron Scheduling, Agile

CERTIFICATIONS

Programming & Data Structures using Python | NPTEL, IIT Madras

Sept 2024

Spring Boot Essentials | Building secure, database-driven applications with cloud deployment

Sept 2025
